

# B V AKSHARA

Software Developer | Cybersecurity Analyst  
[aksharabalaji1010@gmail.com](mailto:aksharabalaji1010@gmail.com) Chennai

## Professional Summary

Computer Science Engineering student specializing in Cybersecurity, with hands-on experience in vulnerability assessment, penetration testing, and embedded systems development. Seeking roles in Software Development or Cybersecurity where I can apply technical skills, a strong analytical mindset, and a commitment to continuous learning.

## Technical Skills

### Programming & Development

|        |      |     |              |         |       |
|--------|------|-----|--------------|---------|-------|
| Python | VAPT | SQL | UI/UX Design | VS Code | Excel |
|--------|------|-----|--------------|---------|-------|

### Cybersecurity Tools

|            |      |            |           |           |      |
|------------|------|------------|-----------|-----------|------|
| Kali Linux | Nmap | Burp Suite | Wireshark | OWASP ZAP | VAPT |
|------------|------|------------|-----------|-----------|------|

## Experience

### Cybersecurity Intern | Graspear Solutions Pvt Ltd

- Conducted vulnerability assessments and penetration testing (VAPT) on web applications using Kali Linux, Nmap, and Burp Suite.
- Identified and documented critical web vulnerabilities including SQL Injection, XSS, and authentication weaknesses with recommended mitigations.
- Performed network scanning and security analysis to detect and report potential threats.
- Produced detailed security reports with vulnerability findings and remediation steps.

## Projects

### Smart Accident Detection & Emergency Notification System | LEAP Project

- Built an IoT-based system using Arduino, vibration sensors, GPS, and GSM modules to automatically detect vehicle accidents and dispatch emergency alerts.
- Implemented real-time GPS location tracking to pinpoint accident sites and route alerts to hospitals and police stations via automated SMS/calls.
- Designed severity-analysis logic to minimize false positives and reduce emergency response time.

### Network Security Monitoring System | Academic Project

- Designed and implemented a real-time network security monitoring system to detect suspicious traffic, unauthorized access attempts, and potential intrusions.
- Used Wireshark and Nmap to capture and analyze network packets, identifying anomalies such as port scanning, brute-force attempts, and unusual data flows.
- Configured alert rules and logging mechanisms to flag and record security events for audit and incident response purposes.
- Generated detailed monitoring reports highlighting threat patterns and recommended countermeasures to strengthen network defenses.

## Education

### B.E. Computer Science Engineering (Cybersecurity)

Prince DR K Vasudevan College of Engineering and Technology, Chennai

### HSC (60%) & SSLC (80%)

Kendriya Vidyalaya Island Grounds, Chennai

## Certifications & Training

- Introduction to Cybersecurity — Simplilearn
- Cybersecurity Awareness — HP Life
- Cybersecurity Analyst Job Simulation — Tata (via Forage)

## Languages

|                      |                  |                      |
|----------------------|------------------|----------------------|
| English - Proficient | Hindi - Advanced | Tamil - Intermediate |
|----------------------|------------------|----------------------|
